

**QUALITY POLICY**

**1- Introduction**

The aim of this Policy is to establish the principles and company guidelines in relation to the quality of its products.

Almirall's management shall set the framework for the quality system through definition and implementation of the policies and the corporate quality procedures necessary for a correct comprehension and guidelines implementation.

Almirall's departments are responsible to ensure that this Policy is understood, implemented and maintained at all levels of the organisation and in all Almirall locations.

This Policy will be communicated to all the employees and each Almirall employee shall understand and incorporate its principles into their approach to daily work.

**2- Principles**

This Policy will be internally developed through the implementation and continuous improvement of a "Pharmaceutical Quality System" based on the spirit of Guide Q10 of the ICH (International Conference for Harmonization).

The Pharmaceutical Quality System shall act as the global framework to assure full compliance of international quality regulations in Almirall, including the following:

- Good Laboratory Practices (GLP)
- Good Manufacturing Practices (GMP)
- Good Clinical Practices (GCP)
- Good Pharmacovigilance Practices (GVP)
- Good Distribution Practices (GDP).

Almirall's departments shall be responsible in establishing, implementing and maintaining local procedures which develop the principles of the regulations mentioned above.
