Interactions between healthcare companies and Healthcare Professionals (HCPs), Healthcare Organizations (HCOs) and Patient Organizations (POs) are essential to establish and maintain the best possible supply of medicinal products. Almirall ApS recognizes there is a growing expectation that such interactions must be conducted with integrity and must be transparent in order to create a better understanding of, and ultimately build trust in, the validity of industry interaction with the medical profession. Therefore, Almirall ApS supports the principle of transparency and complies with the local and EFPIA (European Federation of Pharmaceutical Industries and Associations) Codes requirements for the disclosure of Transfers of Value (ToV) conducted in 2024 with Healthcare Professionals, and Healthcare Organizations.

4. Specific considerations

Country unique identifier

Almirall ApS aims to maintain an up-to-date contact database which allows HCPs to have more than one practicing address associated with them, for example when an HCP works at different centers / hospitals etc. For the purposes of disclosure, the database utilized only recognizes one address - the principal practice address.

Self-incorporated HCP

Almirall ApS considers legal entities with self-incorporated HCPs as a HCO.

Multi-year agreements

Where agreements, sponsorships, studies and the like fall into more than one year, these are disclosed when any activity is performed, hence payment will be split over several years.

Quality Checks

Prior to reporting, Almirall internal processes ensure Transfer of Value made to HCP, HCO or PO are correctly collected in Almirall.

5. Data protection legal basis

In the spirit of transparency and in compliance with Data Privacy requirements Almirall has ensured each agreement with an HCP includes a section for the individual to consent to either individual or aggregate disclosure, this is requested for each activity.

The consent management system enables amendment from individual to aggregate or vice versa and consents are changed manually in the database. If an HCP requests clarification or changes to the disclosed data or consent status Almirall will act on the request as appropriate, reply to the HCP with the clarification requested or that the change has been implemented. Disputes on the value of the ToV disclosed will be resolved as quickly as possible and the disclosed data amended where possible and required.
